December 31, 1979

JAMES L. TALBOT, EXECUTIVE DIRECTOR
EUGENE W. WARD, GENERAL COUNSEL

The Honorable Lamar Alexander
Governor of Tennessee
State Capitol
Nashville, Tennessee 37219

Dear Governor Alexander:

In accordance with the provisions of Title 65, Section 116, Tennessee Code Annotated, we herewith submit to you the Annual Report for the period beginning January 1, 1979, and ending December 31, 1979, of the Tennessee Public Service Commission.

We have endeavored to present as briefly as possible a summary of the details of the regulatory accomplishments of this Commission.

Respectfully submitted,

Z. D. Atkins
Chairman

Frank D. Cochran
Commissioner

Keith Bissell
Commissioner

Commissioners

Z. D. Atkins, Chairman

Born on a Weakley County farm. Educated in public schools of Weakley and Gibson Counties. College education at Bethel College, Memphis State College, Ohio State University, Southern University College of Law, Memphis. Former teacher, West Tennessee District Director of National Youth Administration, practicing attorney in Gibson County from 1942 until he became Commissioner of Finance and Taxation for Tennessee in 1953-58. Served in U. S. Navy during World War II. Member of Tennessee Legislature serving in the House during 1935 and in the Senate during 1947 and 1949. Past Commander of Andrew Jackson American Legion Post No. 35 of Trenton. Member of Methodist Church, Thirty-second Degree Mason and Shriner. Practiced law in Nashville from 1958 to 1964. Elected to the Commission in November 1964, re-elected for full six-year term, November 1968, and relected for six-year term November 1974. Married to the former Peggy Horne of Memphis. They have one daughter, Mrs. Joe Lackey, Jr. and two granddaughters, Brenner and Nell Blythe Lackey.

Frank D. Cochran, Commissioner

Home, Tiptonville, Tennessee. Education - University of Tennessee at Martin, David Lipscomb College, University of Tennessee at Knoxville, University of Tennessee College of Law - Doctor of Jurisprudence. Four Term State Legislator, one term as House Floor Leader and two terms as Committee Chairman. City Attorney and City Judge in Tiptonville. County Attorney for Lake County. **Honored twice by National Jaycees as one of the "Outstanding Young Men in America". **Special Assistant to Governor-1975. Member of Church of Christ. Married to former Patsy Whitfield, two sons, Kent and Craig. Elected to a six-year term in November 1976.

Keith Bissell, Commissioner

Born, Oak Ridge, Tennessee. Attended Oak Ridge Public Schools. Served four years in the United States Air Force. Earned a B.S. Degree in Business Administration with a major in Transportation from the University of Tennessee at Knoxville. Worked as Director of the Transportation Rate Division of the Tennessee Public Service Commission from 1966-70 while attending night law school in Nashville. In 1970, earned Doctorate of Jurisprudence Degree and was elected to the Tennessee General Assembly. Elected to four terms in the Legislature during which time he served as Chairman of the House Labor and Consumer Affairs Committee, and the House Sub-Committee on Energy, Majority Whip, as a member of the National Conference of State Legislatures' Energy Task Force, and as a member of a special legislative committee established to study utilities and utility district legislation. Member of the Oak Ridge Jaycees, the Elks Club, the Eagles Club, the American Veterans Club, the Claxton Optomist Club, and the Anderson County Bar Association. Attends the Methodist Church with his wife, Pat, and their two children, Debbie and Kelley.

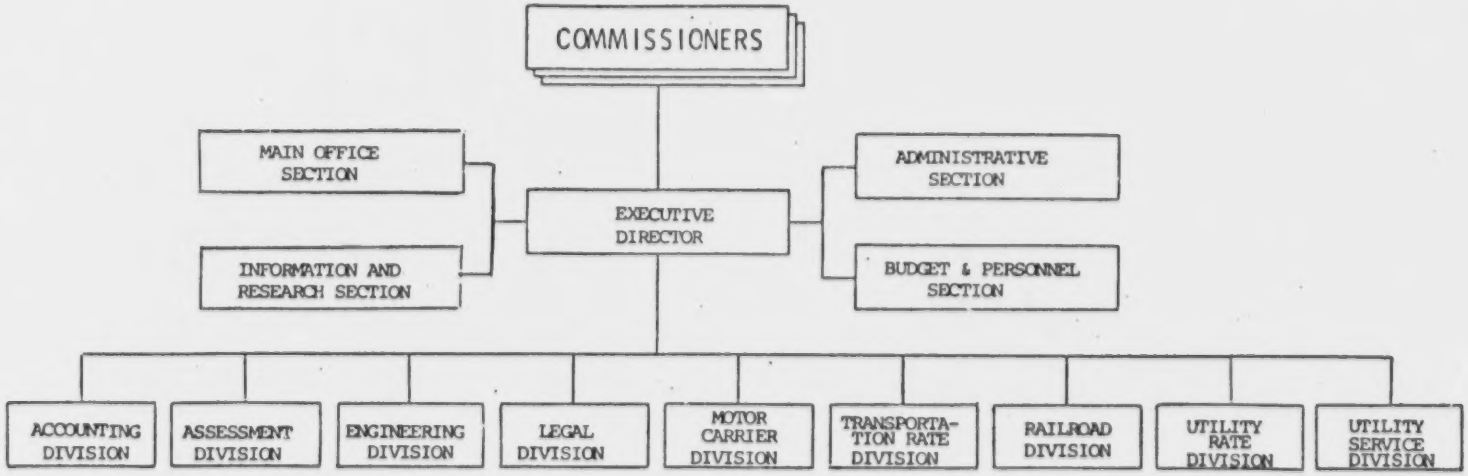
ORGANIZATION CHART
TENNESSEE PUBLIC SERVICE COMMISSION



Tennessee Public Service Commission

ITS COMPOSITION, PURPOSES, AND FUNCTIONS

The Tennessee Public Service Commission consists of three elected members. Each Commissioner's term of office is for six years, one member being elected biennially in a statewide election to succeed the Commissioner whose term expires next after said election. By statute each grand division of the State of Tennessee has a representative member of the Commission, and the Commissioners themselves elect a Chairman biennially.

The Commission is a statutory body with several basic functions delegated it by the Legislature. Primarily these may be stated as the supervision of all aspects of railroads, motor carriers, and utilities that perform services within the boundaries of Tennessee (intrastate) and the assessment of all county and municipal ad valorem taxes of these utilities. The Commission's legislative powers include the making of all necessary rules for utility operations, including the operating rates and the complete administration of these rules. Further, it has quasi-judicial powers including decisions concerning public convenience and necessity and the authority of decision concerning any conflicts or controversies arising from utility operations.

No governmental agency, state or national, has more profound impact upon the daily lives of Tennessee residents than does the Tennessee Public Service Commission.

Under the Commission's jurisdiction are those things supplies by private enterprise which people of the State must have; light, power, heat, communication and transportation. Private residents or managers of vast industry who trip an electric switch, adjust a thermostat, lift a telephone, ride a public carrier, and who ship or receive commodities by rail or motor carrier are to some degree affected by the responsibility of the Commission to see that adequate service is provided at a reasonable charge.

State regulation of privately owned and operated utilities is a product of the democratic system. In essence, the primary purpose of the Tennessee Public Service Commission is to insure service to the public at fair and just rates by the utilities which it regulates.

Today's public utility, to a large extent, is owned by the same public which it serves through the continuing expansion of its stock ownership. Destruction, through regulation in the guise of public benefit, would devastate the public investors in the private utilities as well as the public customers of that utility.

In its own area each utility subject to regulation by the Tennessee Public Service Commission has, in a broad sense, a monopoly. When overlapping or when in potential conflict in competition, these utilities must show necessity for their services, the ability to serve at a reasonable price, and long-range benefits to the public. Wasteful competition by duplication of services would be at public cost. Destructive competition eventually could victimize the public.

The Tennessee Public Service Commission has jurisdiction over electric companies, telephone companies, water companies, gas companies, telegraph companies, power transmission companies, sewerage companies, mobilphone companies, railroad companies, express companies, sleeping car companies, motor truck companies, and motor bus companies.

DUTIES OF THE COMMISSION

The Legislature has vested in the Tennessee Public Service Commission certain broad and general powers which have been judicially recognized and affirmed by the Supreme Court of Tennessee. These may be generally summarized as follows:

1. Legislative powers which include the making of rules. A familiar example of this function is the Commission's duty of prescribing regulations including rates to be observed by public service companies.

2. Administrative powers which include the application of the rules prescribed and the application of the laws enacted by the Legislature in particular.

3. Quasi-judicial powers which include the decision of controversies arising within the jurisdiction of the Commission as well as the holding of hearings to determine that which meets the public convenience and necessity.

Some of the routine duties of the Commission which are performed regularly and which fall under the broad general headings heretofore outlined are as follows: The maintenance of current calculations for rate making purposes of all utilities; the checking of monthly and annual operating reports; the computation of rates of return of companies subject to the Commission's jurisdiction; the investigation, determination, and fixing of just and reasonable rates; the making of investigations and the holding of hearings; the determination of the propriety of granting certificates of convenience and necessity to public utilities and motor carriers making application therefor, after public hearing; cooperation with federal agencies with powers parallel to those of the Tennessee Public Service Commission including the Federal Communications Commission, the Federal Power Commission, and the Interstate Commerce Commission for the purpose of coordinating regulation and the protection of the interests of Tennessee and its citizenry; the valuation and assessment annually of all railroad, utility and motor carrier properties in the State for county and municipal ad valorem purposes.

The Tennessee Public Service Commission works in conjunction with the Department of Transportation, Office of Pipeline Safety, in enforcing safety standards for transportation of gas by pipeline. Under the jurisdiction of the Commission for this purpose are privately owned gas companies, gas utility districts, municipal gas operations, and Federal housing projects.

There are various other duties performed by the Commission under its own rules and regulations, all of which are related in one way or another to the rates, services, capital structure, income, reports and systems of accounts of the companies operating within the State of Tennessee over which the Commission has jurisdiction.

The Tennessee Public Service Commission meets in regular session referred to as the "Commission Executive Conference" on the first, third and fifth Tuesday of each month. These are public meetings open to the public and the minutes of each meeting are fully recorded and are open to public inspection. These meetings are held in compliance with Chapter 442, Public Act of 1974, commonly referred to as the "Sunshine Law."

WHAT THE COMMISSION DOES NOT DO

The Commission is excluded by Tennessee law from any jurisdiction to regulate the rates, services or operations of a number of enterprises generally considered to be public utilities.

These include:

1. Any water, gas (except for safety), electric, or similar utility system owned or operated by any agency of the United States, the State of Tennessee, or any county or incorporated town or city in Tennessee, and any transportation system so owned or operated. (Section 65-401, Tennessee Code Annotated).

2. Any water, gas (except for safety), or similar utility system organized and operating as a utility district under the Utility District Law of 1937. (Section 6-2613, Tennessee Code Annotated).

3. Any electric and telephone cooperative not organized or doing business for profit. (The sole jurisdiction over such cooperatives which the Commission has is to assess their properties for county and municipal taxation.) (Section 65-401; 65-2530; Tennessee Code Annotated).

4. Any bus carrier of passengers, operating exclusively within the corporate limits of any municipality or within a distance of two to seven miles outside such limits, depending on the population of the city. The rates, services and operations of such companies are regulated exclusively by the cities in which they operate. (Section 65-1001, Tennessee Code Annotated).

The members of the Commission and its staff frequently receive calls and letters making complaints about some phase of the operation of these non-regulated enterprises; but due to the limits placed on its authority by the Tennessee Legislature, the Commission lacks jurisdiction to handle such complaints.

SUBJECTS OF THE COMMISSION'S JURISDICTION

As of December 31, 1979, the railroads, motor carriers, and public utilities, subject to the jursidiction of the Tennessee Public Service Commission were by approximate number and general classification as follows:

Motor Bus Companies (Passenger)	240
Motor Truck Companies	3,088
Passenger & Sleeping Car Company	1
Private Car Companies	204
*Public Utilities	328
Railroads	18
**Air Line Companies	12
Water Transportation Carriers	16

*The term "Public Utility" applies generally to all of the above but specifically in this instance to the following which are included in the composite figures:

Electric Companies	3
**Electric Cooperatives	25
***Gas Companies, Utility Districts & Municipalities	100
***Transmission Lines, Hydrogen Lines & Direct Sales Customers	29
***Housing Authorities, Apartments, Motels & Mobile Home Parks	84
Mobilphone Companies	13
Pipeline Companies	20
Power Transmission Companies	3
Telegraph Companies	1
Telephone Companies	20
**Telephone Cooperatives	10
Water & Sewerage Companies	20

**Air Line, Water Transportation Carriers, Electric Cooperative and Telephone Cooperative Companies are under the Commission's jurisdiction only for Ad Valorem Tax Assessment.

***Utility District and Municipalities are under the jurisdiction of the Tennessee Public Service Commission insofar as gas safety is concerned. Pipeline companies are under this Commission's jurisdiction insofar as gas safety is concerned and for Ad Valorem Assessment.

Executive Director

Obviously three men cannot perform the numerous duties of their offices without extensive and expert assistance.

This is provided in a staff organization consisting of an Executive Director, ten divisions, administrative office, budget and personnel sections.

These are assisted by a field staff of railroad safety inspectors, motor carrier enforcement officers, gas safety inspectors, and utility investigators who help see that the rules and regulations of the Commission are enforced.

The Executive Director performs both the role of Secretary and that of Executive Director and is responsible for planning, directing, and coordinating the entire operation of the Commission. The Executive Director is delegated the responsiblity and authority to direct the internal operations of the Commission. This includes the development of administrative policies and procedures including fiscal and personnel procedures.

The Executive Director with the assistance of those working under his supervision relieves the Commissioners of many administrative tasks that formerly consumed much of their time. The Director is authorized by the Commission to take necessary action to require that the duties, responsibilities, and assignments of the divisions of the Commission are accomplished in an effective and efficient manner and to issue directives to the employees of the Commission to achieve that objective. Generally, the duties of the Executive Director are as follows:

1. Custodian of the official records of the Commission.
2. Develop and review internal administrative policies and procedures.
3. Plan, direct, and coordinate the administrative activities of the Commission's staff.
4. Coordinate and expedite matters pending before the Commission.
5. Develop effective fiscal and personnel management.

6. Serve as Personnel Officer.

7. Assist in keeping the public advised of the responsibilities and the duties of the Public Service Commission.

Under the direct supervision of the Executive Director are the Main Office Section, the Administrative Section, and the Budget-Personnel Section. The main duties of these sections are as follows:

MAIN OFFICE SECTION

1. Distribution of mail.
2. Scheduling of hearings.
3. Maintain list of all pending dockets.
4. Preparation of certifications to Chancery Court.
5. Maintain ledger of accounts receivable for certified copies, transcripts, and xerox copies; and send invoices for these documents.
6. Keep the Minute Book.
7. Maintain file of all original orders.
8. Maintain permanent records of all hearings.
9. Maintain record of all files sent to Archives.
10. Record word-by-word proceedings of all formal hearings.
11. Upon request prepare transcripts of hearings.
12. Edit, publish, and distribute the Commission's reports, rules, and regulations.

BUDGET-PERSONNEL SECTION

1. Preparation of budget.
2. Preparation of payroll.
3. Audit and control of expenditures.
4. Collect and deposit receipts.
5. Maintain personnel records.
6. Maintain all fiscal reports of the Commission.
7. Process travel claims.
8. Process requests for purchases.
9. Handle insurance and retirement matters.

APPROPRIATIONS, FEES AND EXPENSES

For the Fiscal Year 1978-79, the General Assembly appropriated $3,121,500 for the operation of the Tennessee Public Service Commission. The expenditures were $2,991,143 which were $130,357 less than the amount appropriated.

DISBURSEMENTS

1978-79

Personal Services & Employees' Benefits	$2,418,788.17
Materials and Supplies	44,720.28
Printing and Binding	11,974.55
Equipment	19,026.80
Communication and Postage	99,787.14
Travel	82,654.33
Dues and Professional Services	34,986.34
Insurance, Bonds and Rent	82,408.35
Maintenance	45,896.16
Motor Vehicle Operation	150,901.09
TOTAL	$2,991,143.21

REVENUE FEES

Railroad Inspection	$ 321,804.52
Certified Copy	408.00
Utility Filing Fee	350.00
Motor Carrier Inspection	1,506,309.00
Utility Inspection	730,774.99
Motor Carrier Filing Fee	82,340.00
Departmental Revenue	437,377.31
TOTAL	$3,079,363.82

Administrative Section

The Administrative Section is a Section of the Executive Director's office, under the supervision of the Administrative Officer. The office is staffed with six employees. A brief summary of the responsibilities of the Section would include the following:

The Administrative Section maintains all Commission docket files in its central filing system. This Section is responsible for the supervision of a continuing records management program for the Commission. All records and forms duplication is coordinated in the Administrative Section.

This Section assembles and processes information to the State Information System Services Division for the data pertaining to our Assessment Division and Motor Carrier Division, and maintains an up to date list of all motor carriers under the Commission's jurisdiction.

The Administrative Section is responsible for purchasing and distributing all equipment and supplies as well as the maintenance of records of equipment and supplies and all other office support functions.

Accounting Division

The Accounting Division is responsible for establishing and supervising the several uniform systems of accounts adopted by the Commission which are an essential part of the regulatory process. In order for effective regulatory control to be possible, utilities providing similar services and of similar size must use the same type of accounting systems. Audits are conducted by the Accounting Division for the purpose of ascertaining whether the utilities are complying with the applicable Uniform System of Accounts and to determine whether or not the financial data submitted by utilities in formal rate proceedings is proper and reliable in the Commission's determination of just and reasonable rates.

Utilities under the jurisdiction of the Tennessee Public Service Commission are required to submit various monthly, quarterly, and annual financial reports to the Accounting Division. These reports are carefully analyzed and scrutinized as part of the Commission's "constant surveillance" policy. The reports are then filed and used as reference material in preparing technical reports in connection with formal rate cases, depreciation rate studies, and statistical studies. These reports and studies aid the Commission in staying abreast of the current earnings performance of the utilities it regulates and in prescribing orders balancing the right of the public to adequate utility service at reasonable rates and the right of the utilities to an adequate rate of return on its investment.

Members of the Accounting Division participate in public hearings for the purpose of submitting exhibits and testimony as pertain to accounting matters in formal rate cases. Another function of the Division is to analyze all accounting schedules and data as submitted in such formal cases presented by the applicant and work with the Legal and Rate Divisions in preparing cross-examination of applicants' exhibits and testimony.

The Accounting Division prepares general statistical data which pertains to all utilities. A small part of this data is embodied in this annual report. This statistical data reflects, among other things, comparative revenue, expense and investment per customer of the various utilities. It serves as a useful tool in auditing and rate case work.

Another task assigned to the Accounting Division is the computation and billing of the inspection fees for all railroads and utilities.

The primary duties of the Accounting Division are more fully presented below:

1. General Accounting

    a. Drafting systems of accounts

b. Promulgation of accounting rules and regulations
c. Interpretation of Uniform System of Accounts and explanation of accounting rules and regulations
d. Advice relative to all matters of accounting affecting regulation

2. Auditing and Field Investigations

a. General compliance audits for regulatory purposes
b. Audit of annual reports
c. Field investigations of small companies for the purpose of verifying or assisting with preparation of reports
d. Auditing test period financial operating results in connection with rate case work
e. Internal audit of motor carrier inspection fees

3. Rate Case Work

a. This involves the study of applicants' exhibits and testimony introduced in formal cases and assistance with cross-examination pertaining thereto; the preparation of accounting, financial and statistical schedules by the staff itself for the information of the Commission or for formal presentation in the cases together with expert testimony in conjunction therewith
b. Studies of annual reports, monthly reports, and budget estimates for the company under consideration and comparisons with other companies
c. Future estimates of plant, revenues, expenses, earnings, rate of return, capital structure, and such other information as may be appropriate

4. Statistical

a. General data pertaining to all utilities
b. Detailed statistical data prepared on a per customer or per unit basis for the purpose of comparing revenues, expenses, and investment per customer
c. Various other statistical data as required from time to time

5. Report Analysis

a. The general review of the annual and monthly reports of utility companies operating in the State of Tennessee and subject to the jurisdiction of the Commission
b. An account and statistical analysis of annual reports by groups or companies

c. Special analysis of the reports of certain companies whenever unusual or abnormal occurrences are indicated
d. The preparation of annual report forms when such cannot be obtained from other authorities; modifications of same

Following is a list of major activities which required extensive investigation by the accountants and auditors of the Commission during 1979:

	Company	Docket No.	Assignment	Status at 12/20/79
1.	Appalachian Power Co.	ER79-549	Rate case Before FERC	Closed
2.	Belinda City Water Co.		Department of Housing and Urban Development Inquiry	Closed
3.	Concord Telephone Exchange, Inc.	U-6712	Rate Case	Closed
4.	Friendship Water Co.	U-6744	Rate Case	Closed
5.	Hartsville Gas Co.	U-6700	Limited Compliance Audit	Closed
6.	Jackson Mobilphone Co.	U-6726	Certificate of Convenience & Necessity (CCN)	Pending
7.	James Bowden Mobilphone Co.	U-6692	CCN	Closed
8.	James Bowden Mobilphone Co.	U-6727	CCN	Closed
9.	Kingsport Power Co.	U-6825	Rate Case	Pending
10.	Mahaffey Message Relay, Inc.	U-6476 U-5948 U-5946 U-4940	Special Audit	Pending
11.	Millington Telephone Co.	U-6796	Rate Case	Pending
12.	Nashville Gas Co.	U-6795	Application to establish franchise fee factor	Pending
13.	Nashville Mobilphone Co.	U-6732	CCN	Closed
14.	Nashville Mobilphone Co.	U-6733	CCN	Closed

	Company	Docket No.	Assignment	Status at 12/20/79
15.	Prospect Mobilphone Co.	U-6522	CCN	Closed
16.	Prospect Mobilphone Co.	U-6523	CCN	Closed
17.	Riverbend Service Co.	U-6768	Rate Case	Closed
18.	Roan Mobilphone Co.	U-6567	CCN	Pending
19.	Roan Mountain Water Co.	U-6690	Rate Case	Closed
20.	Royal Oaks Service Co.		Preliminary discussions on rate review	Pending
21.	South Central Bell Telephone Co.	U-6493 On Remand	Rate Case	Closed
22.	South Central Bell Telephone Co.		Audit of working capital study	Pending
23.	South Central Bell Telephone Co.		Brief to Tennessee Supreme Court	Closed
24.	Southeast Mobilphone Co.	U-6819	CCN	Pending
25.	Telpage of Nashville, Inc.	U-6807	Acquisition	Pending
26.	Tennessee-American Water Co.	U-6679	Rate Case	Closed
27.	Tennessee Movers Association	SMC-733	Rate Case	Closed
28.	Tennessee Natural Gas Lines, Inc.	RP79-21	Rate Case before FERC	Closed
29.	Tennessee Trailblazers, Inc.	SMC-808	Elimination of Route	Pending
30.	United Inter-Mountain Telephone Co.	U-6640 On Remand	Rate Case	Pending
31.	United Inter-Mountain Telephone Co.	U-6811	Application of authority to accept contribution to equity	Pending
32.	United Cities Gas Company		Audit of PGA Filings	Pending
33.	Volunteer Movers Association	SMC-731	Rate Case	Closed
34.	Volunteer Natural Gas Co.		Audit of PGA Filings	Pending

	Company	Docket No.	Assignment	Status at 12/20/79
35.	Volunteer Natural Gas Co.	U-6835	Merger	Closed
36.	Analysis of impact of accounting changes regarding sale of terminal equipment by regulated telephone utilities			Pending
37.	Analysis of Cost of State Vehicles			Closed
38.	Revision of annual reports filed by utilities under the jurisdiction of PSC			Closed

SUMMARY OF REGULATED UTILITIES
INVESTMENTS, RESERVES, REVENUES, AND EXPENSES

The Accounting Division prepares general statistical data which it uses to study each regulated utility. The statistics embodied in this report are a composite of all privately-owned telephone, gas, and water utilities, and are used to show the growth in investments, revenues, expenses, and customers which has taken place within the respective utility areas in the time periods shown.

In 1974, the average utility gross plant investment was $1,465,220,787 and it had grown to an average of $2,298,156,497 for 1978.

This represents a growth of $832,935,710. This additional investment was necessitated by an increase in the number of customers served and technological advances requiring replacement of obsolete equipment. Annual operating revenues increased $393,105,587 with a corresponding increase in annual operating expenses of $335,940,271 over the five year period.

The changes which have taken place in net operating income can be best exemplified by viewing statistical sheets of the separate utilities in the following pages.

The rate of return realized on net plant is presented in the following statistical data for each utility area. The rate of return generally reflects the earnings available to support the debt and equity capital.

Assessment Division

The Assessment Division is responsible for appraising and assessing for Ad Valorem taxation, for State, County and Municipal purposes, all of the properties of every description, tangible and intangible, within the State, owned by and all personal property used and/or leased by any public utility or railroad company under its jurisdiction. For 1979, these include 441 truck companies, 53 bus companies, 18 railroad companies, 204 private car companies. 1 passenger and sleeping car company, 12 airline companies, 16 water transportation carriers, 25 electric cooperative companies, 3 electric companies, 7 gas companies, 13 mobilphone companies, 20 pipeline companies, 3 power transmission companies, 10 telephone cooperative companies, 1 telegraph company, 20 telephone companies, and 20 water and sewerage companies, for a total of 867 public utility companies.

In dealing with complex properties of this type, the Commission has set policies to insure that the staff of the Assessment Division maintains a high level of professionalism in the field of railroad and public utility property valuation. In 1979, members of the staff attended various workshops, conferences, and schools on the valuation of railroad and utility property. These schools were conducted by, the International Association of Assessing Officers, the Tennessee Association of Assessing Officers, Wichita State University, and the Southern Association of State Property Tax Administrators. In each of these different workshops, new problems and new ideas were discussed about the never ending and ever changing field of public utility taxation.

In 1979, the Director of the Assessment Division was elected to serve as President for the International Association of Assessing Officers, a 9000 member association. This international organization is dedicated entirely to professionalism and the upgrading of property tax assessment administration. It conducts schools, seminars and professional appraisal courses internationally as well as awards professional designations for expertise in the appraisal field after completion of rigorous schooling, comprehensive exams and demonstration appraisals.

Another member of the staff received the professional designation, Certified Assessment Evaluator (CAE). As of December 31, 1979, the appraisal staff of the Assessment Division has three Certified Assessment Evaluators (CAE), one Senior Residential Appraiser (SRA), and one Residential Evaluation Specialist (RES), as well as two other members who are actively working toward these professional appraisal designations.

To assure uniformity between the assessments of utility property and local property, the Assessment Division is continuing its reappraisal and mapping of all railroad and utility property in Tennessee. The reappraisals of land and building are made in addition to the Commission's total reappraisal and revaluation of all companies every year. As of 1979, all utility properties have been reappraised.

In 1979, approximately 132 utility and railroad companies protested their assessments to the State Board of Equalization. Several companies protested only on equalization and others on both equalization and valuation. The State Board of Equalization upheld each and every assessment recommended by the Public Service Commission.

The utility assessments for 1979, were determined in accordance with the Constitutional Amendment which requires them to be assessed at 55 percent of value. The railroad and private car assessments were determined in accordance with the Railroad Revitalization and Regulatory Reform Act (4-R Act) of 1976, which requires them to be assessed at 40 percent on Real Property and 30 percent on Personal Property. The total assessment for all companies assessed by the Tennessee Public Service Commission for the year 1979 amounts to $1,929,351,150. However, the State Board of Equalization did equalize all assessments made by the Commission. This equalization was on a county by county basis and was in accordance with the ruling and guidelines set out in 1977 by the U. S. District Court - Middle District of Tennessee.

Engineering Division

The Engineering Division generally involves itself in the following:

1. Administration of the Natural Gas Pipeline Safety Act of 1968.
2. Applications for new franchises for utilities being formed.
3. Depreciation studies for regulated utilities.
4. Expansion of existing utility franchises.
5. General technical aid.
6. Providing information to interested parties.
7. Rate cases.
8. Safety programs.
9. Service evaluation.
10. Technical associations and conferences.

1. One of the major responsibilities of the Division is the administration of the Natural Gas Pipeline Safety Act of 1968. The Division is certified under Section 5 (a) of the Act by the United States Department of Transportation, Office of Pipeline Safety, to enforce the provisions of the Act, Parts 191 and 192. The personnel in the Division consist of the Director of Engineering, Secretary, and five Pipeline Safety Inspectors located in different areas of the state. There are 7 private gas utilities, 23 gas utility districts, 70 municipal gas systems, 4 intrastate pipelines, 1 hydrogen line, 52 housing authorities, 12 mobile home parks, 17 apartments, 3 motels, and 3 miscellaneous master meters, and 21 direct sales from interstate transmission lines, for a total of 214 gas utilities under the pipeline safety jurisdiction of the Commission. Other than privately-owned utilities, the jurisdiction is for safety only.

During 1979, approximately 1,160 field inspections were made which resulted in the issuance of 137 citations and one (1) penalty collected. There were 13 accidents involving natural gas which were reported to the Division and investigated by the Inspectors.

Members of the Division attended one-week training sessions in pipeline safety sponsored by the U. S. Department of Transportation, Office of Pipeline Safety; and the Transportation Safety Institute in Oklahoma City, Oklahoma. Subjects covered included Failure Investigation Techniques, Regulation Enforcement and Joining of Pipeline Materials.

2. The applications for new franchises for utilities being formed take the form of dockets where Certificates of Convenience and Necessity are applied for. The Division reviews cost estimates, engineering studies, and proposed service area boundaries.

3. Depreciation rates for regulated utilities are reviewed by the Division in cooperation with the Utility Rate Division. Studies submitted by utilities are reviewed for method and approach. Independent analysis and comparisons are made and coordinated with Federal regulatory agencies. Depreciation studies were submitted by the Concord Telephone Company, Millington Telephone Company, and General Telephone Company. A three-way meeting between the TPSC, Federal Communications Commission, and General Telephone Company was held in Durham, North Carolina.

4. When expansion of existing facilities is planned by a utility, the construction plans and estimates are submitted by the utility to this Division for approval. The Division checks the plans and studies to see that applicable rules, regulations, and statutes are complied with and that the latest technical developments are being incorporated into design where necessary, feasible, and economical. This Division follows the progress of approved expansion by making field inspections.

During 1979, the Engineering Division reviewed and approved new construction plans and estimates for telephone companies in Tennessee.

The Division reviewed and approved plans for construction submitted by railroads operating in the state. Field inspections and investigations were carried out throughout the state at various industry and railroad facilities. The Division worked closely with the Railroad Division in inspection, investigation, and suggestions for proper installation and improvement of railroad facilities. The Division testified in Show Cause hearings requiring engineering information and prepared technical questions for cross-examination of railroad engineers, consulting engineers, and industry engineers and representatives to insure compliance with the Tennessee Code Annotated and Commission Rules, Regulations, and Statutes for all new construction and rebuilt facilities. The Division assisted with suggestions for correcting deficiencies throughout the state for various railroads and industries in the interest of railway safety.

The Division reviewed construction plans and specifications submitted by water companies operating in Tennessee. Cost estimates were prepared for the Commission involving the extension of facilities and improvement of facilities, requested by both customers and water companies.

The Division reviewed construction plans and specifications for expansion of facilities by gas companies.

5. General technical aid is provided to the Commissioners and to other Divisions of the Commission as required. Provisions are contained in the utility rules and regulations for codes by which all utilities must abide. Technical interpretation of these codes is the responsibility of the Division.

6. Providing information to interested parties is done continually by the Division. Questionnaires from many sources are received, completed and returned on a variety of topics. Interviews are given and presentations to seminars and conferences are made.

7. In rate cases, the Engineering Division reviews depreciation rates, equipment and installation costs, prepares questions for cross-examination of company witnesses, and presents expert testimony.

8. Much of the emphasis in the Division's work is related to safety. One purpose for the review of construction plans of utilities and railroads is to attempt to promote and insure the safety of the employees, the customers and the general public.

The Division worked with the State Health Department to improve water and sewer service and water quality. Gas and railway safety are discussed separately.

9. Service evaluations for utilities continued during 1979. Telephone service evaluations involved special problems encountered by customers. Service complaints where technical assistance was required were handled in conjunction with the Utility Service Division.

10. Members of the Engineering Division served on the following technical committees: SEARUC Special Telephone Committee - Chairman and member, and National Conference of Regulatory Utility Commission Engineers - Executive Committee and President.

Members of the Division attended and participated in the Federal State Regional Pipeline Safety Meeting, the National Conference of Regulatory Utility Commission Engineers, the Tennessee Gas Association Annual Conference and Fall Management Conference, and the Tennessee Telephone Association Conference.

Members of the Division serve in the capacity of Administrative Law Judges, Advisors and Expert Witnesses in proceedings before the Commission, Federal agencies, and the Courts.

Legal Division

The General Counsel's office of the Commission serves in various capacities to both the Commission and the Public of the State of Tennessee. The office is under the direction of Eugene W. Ward, General Counsel, who is assisted by Tom Eldridge, R. B. Christian II and Mack Cherry, Assistant General Counsels, and Jean Carloss, Helen Shepherd and Mina Smith, Legal Secretaries, and Virginia Lynch, Legal Assistant. A brief summary of the responsibilities of the General Counsel's office includes the following:

1. Appearing as trial attorney representing the Commission and the citizens of Tennessee in all cases before the Courts of the State of Tennessee, the Federal Courts, the Federal Communications Commission, the Federal Energy Regulatory Commission, and the Interstate Commerce Commission.

2. Advising the general public, persons, and corporations subject to the jurisdiction of the Commission, relative to legal problems which may arise pursuant to said jurisdiction.

3. Participation in hearings conducted by the Commission with the particular responsibilities of:

   (a) Conducting examination of witnesses.

   (b) Furnishing additional evidence when necessary to insure that all pertinent data is adduced at the hearing and that a complete transcript is made.

   (c) Protecting the public interest in all cases and particularly rate proceedings before the Commission.

4. Advising and counseling the Commission and its staff in the course of the routine duties of the Commission relative to the law and its application.

5. Acting as Administrative Judges for the Public Service Commission and also as substitute Joint Board Members for the Interstate Commerce Commission.

6. Appearing before the State Board of Equalization and the Courts in defense of the ad valorem tax assessments as established by the Commission.

7. Preparation of legal memoranda and review of the law for the Commission and its staff.

8. Appearing before the Congress and the Tennessee Legislature on present or proposed legislation that would affect the Commission and the citizens of Tennessee on matters under the Commission's jurisdiction.

During the past year, the General Counsel's office, in addition to the discharge of its routine duties, has made more than 240 Commission and Court appearances in matters involving many millions of dollars, as well as proceedings in which the public interest is measured by some standard other than dollars and cents. The General Counsel and his Assistants for the past twelve months have written 1123 orders pertaining to motor carriers, railroads, utilities, show cause and miscellaneous matters. The following is an abstract of the orders written by the Legal Division during the past twelve months of 1979:

1979	G	SMC	MC	R	U	MISC.	TOTAL
January	1	15	100	17	5		138
February		11	60	3	10		84
March		18	68	19	5		110
April	2	16	43	16	5		82
May		17	36	22	9		84
June		12	54	25	7		98
July		14	88	19	15		136
August		6	44	27	10		87
September		8	36	19	19		82
October		11	58	16	19		104
November		6	34	14	10		64
December		6	31	9	8		54
Totals	3	140	652	206	122		1123

The Commission's duty of providing adequate and legal counsel and protection in support of the Commission's actions is doubly important since the amount involved to each individual citizen is usually small while the aggregate is large and the service is of a necessary nature.

A breakdown of the Commission's court cases shows the following:

Chancery and State Courts	26
Federal Courts	10
F.E.R.C.	40
F.C.C.	1
I.C.C.	6
Total cases pending during 1979	83

20 cases have been closed during the year 1979.

Pending at Close of 1979

Chancery and State Courts	17
Federal Courts	8
F.E.R.C.	32
F.C.C.	1
I.C.C.	5
Cases Pending	63

The Commission acts as counsel for the citizens and ratepayers of this State in rate matters before this Commission and also before the Federal Energy Regulatory Commission, the Federal Communications Commission, as well as the Interstate Commerce Commission.

The General Counsel writes all orders and opinions of the Commission, new or amended rules and regulations, and show cause orders for all motor carriers, railroads and utilities. This office drafts all legislative acts proposed and supported by this Commission. The Attorneys also function as Administrative Judges as provided by statute and also serve as Joint Board members for the Interstate Commerce Commission as substitutes for the Commissioners.

It is the duty of the General Counsel's office to see that the public interest is protected before this Commission and before the Courts of the State of Tennessee, the Federal Courts, and the Federal Regulatory Bodies.

The General Counsel's office this year has been very active in gas curtailment proceedings and in natural gas rate increases before the Federal Energy Regulatory Commission representing the citizens of the State of Tennessee. Also the Commission has been very active in protesting railroad abandonment proceedings, as well as protesting the proposed abandonment of the AMTRAK's "Floridian."

The Commission had numerous cases in court this year and also two railroad abandonment cases before the Interstate Commerce Commission that the Commission won.

There has been much litigation involving telephone rate increases, the most notable case being the case of South Central Bell seeking a ninety-two million dollar rate increase. The Commission is also a party plaintiff in the Federal Court Case involving the constitutionality of the 4R Act.

The Commission has adopted rules and regulations pertaining to railroad safety and has adopted the D.O.T. Rules and Regulations pertaining to transportation of hazardous materials by rail and has also adopted a rule requiring railroads to furnish statistical information regarding tracks and roadbed maintenance.

The following is a summary of the cases pending during the year 1979:

GENERAL COUNSEL'S OFFICE

CASES IN LITIGATION

	NAME	CASE NO.	COURT	PRESENT STATUS
1.	Southern Natural Gas Company	RP 74-6	F.E.R.C.	Pending

Motor Carrier Division

The Motor Carrier Division of the Commission is responsible for the regulation and supervision of the motor carriers operating within the State of Tennessee. The Division is responsible for the enforcement of safety regulations, hazardous material regulations, certification, registration of equipment, agents for service of process, and insurance requirments for motor carriers.

During the period January 1, 1979 - December 31, 1979 there was a total of 9,846 motor carriers qualified with the Commission to operate in Tennessee. Of these companies 3,080 were regulated truck companies and 242 were bus companies. The Motor Carrier Division issued a total of 310,066 permit stamps and 128,909 trip lease permits and temporary wires during this period.

The Motor Carrier Division's staff of enforcement officers are assigned the duties of enforcing the safety requirements and economic regulations of the Motor Carrier Act. During the year 1979, the enforcement officers performed driver equipment complicance forms on 15,026 units from which 4,374 citations were issued for violations. Of the units on which driver equipment compliance forms were initiated, 6,700 were placed out of service until needed repairs were made. The violations for which citations were issued for the following offenses: 1,006 - No Permit Stamp, 915 - No Authority, 286 - No Trip Lease Permit, 1,900 - Safety Violations, 159 - Possesion of Alcohol, and 108 - Possession or Under the Influence of Drugs.

The Motor Carrier Division has continued its progress with the hazardous materials program and has issued citations for violations of the hazardous materials regulations. Educational programs for both the motor carriers and shippers continue to be an important part of the hazardous materials program of this Commission to make the transportation of these commodities over the highways of Tennessee as safe as possible.

During the year 1979, the Division has investigated and processed over 100 complaints which were filed against motor carriers operating within the State of Tennessee.

The Motor Carrier Division continues to work jointly with the Interstate Commerce Commission, the Bureau of Motor Carrier Safety of the U.S. Department of Transportation, and other State agencies in a concentrated effort to promote standards of operation which would encourage progress and help develop a healthy enviroment for the transportation industry and citizens of the State of Tennessee who utilize the services of the transportation industry.

Railroad Division

The Railroad Division has the responsibility of general supervision and regulation of common carriers by rail operating within the State of Tennessee, to the extent that said operations are of an intrastate nature.

The Railroad Division is headed by a Director with a staff of two stenographers and ten Railroad Inspectors. The Director is a member of the National Conference of State Transportation Specialists where he serves as a member of the Executive Committee and of the Railroad Committee. He is also a member of the National Association of Regulatory Utility Commissioners where he serves on the Staff Subcommittee on Railroads.

In addition to the investigation of special complaints filed with the Railroad Division, the inspectors make daily inspections of rail facilities throughout the State. All new construction or expansion of rail facilities must be inspected and approved by the Railroad Division before rail service is instituted. All railroad accidents resulting in fatalities and all major derailments are investigated by the Commission's Railroad Inspectors. In addition to these duties, the Railroad Division is responsible for coordinating functions with the Federal Railroad Administration of the Federal Department of Transportation to enforce the Federal Railroad Safety Act.

On December 31, 1979, there were 8 Class I Railroads and 2 Class II Railroads operating within the State. These 10 railroads have 3,142 miles of main line and 2,198 miles of other track.

CLASS I RAILROADS

Chicago, Rock Island & Pacific Railroad Company
Clinchfield Railroad Company
Illinois Central Gulf Railroad
Louisville & Nashville Railroad Company
Missouri Pacific Railroad Company
St. Louis-San Francisco Railway Company
St. Louis-Southwestern Railway Company
Southern Railway System

CLASS II RAILROADS

Corinth & Counce Railroad Company
East Tennessee & Western North Carolina Railroad Company

JANUARY 1, 1979 Through DECEMBER 31, 1979

Research & Information

The Research and Information Office performs a variety of functions in cooperation with the various divisions of the Commission. At the direction of the Executive Director, special research projects are conducted and spot research is performed in response to requests for information from individual citizens, governmental and other regulatory agencies. The office also works with the Commission and the directors of the several divisions in preparation of information for public dissemination, as well as news releases and other informational materials.

As part of the Commission's efforts to keep the citizens of Tennessee informed of its activities and responsibilities, the Research and Information Office coordinates general public information activities for the Commission, including informal public meetings which are held in various communities throughout the state, and prepares speeches for the Commissioners upon request.

The Research and Information Office of the Commission also serves as the Affirmative Action Office.

Transportation Rate Division

The Transportation Rate Division is a new division in the Public Service Commission created on September 1, 1979. The Commission determined that due to the increase in the workload required to review and process new tariff filings and participate in rate hearings, it was necessary to assign these functions to a division which would devote full time to these duties.

The Transportation Rate Division is responsible for the regulation of intrastate rates, fares, and charges for all motor carriers and railroads operating within the State of Tennessee. All common carriers are presently required to establish and maintain a schedule of reasonable charges and adhere thereto in the rendition of service to the public without undue discrimination, preferences, advantages, and unfair or destructive competitive practices. In order for this to be done properly, detailed knowledge of the financial condition of each certificated carrier is necessary. A primary source of this information is the annual report and financial statement which every carrier is required to file.

When an application for a rate increase is received, an investigation of the financial records of the applicant is conducted to determine if the increase is justified. The Commission also has the responsibility of increasing or decreasing any transportation rate as experience and operations show to be necessary. The Commission will set for hearing any petition for a general transportation rate increase to determine the reasonableness of the increase. The Commission will conduct a public hearing on any transportation rate matter on which there is a protest by an interested party.

If the Commission receives no protest by any interested party concerning an increase in transportation rates other than a general rate increase, the Commission will investigate to determine if the increase is justified. If the Commission concludes that the increase is necessary and reasonable, it may be permitted to become effective without a public hearing. However, if an investigation reveals irregularities or the Commission deems the increase unnecessary or entertains any doubt as to the necessity for the proposed increase, the matter will be set for public hearing.

During the year 1979, the Commission initiated eighty-one (81) formal transportation rate proceedings which resulted in the Commission holding forty-six (46) public hearings. In addition, the Commission rendered its informal opinion on numerous complaints and inquiries concerning rates and tariffs.

The Director of the Transportation Rate Division has been appointed as the Emergency Services Coordinator for the Commission and is authorized to coordinate and direct all emergency response functions and services of the Commission pursuant to Executive Order No. 64. These activities primarily are responding to accidents and incidents involving hazardous materials. In conjunction with its other activities involving the transportation of hazardous materials, the Director of the Transportation

Rate Division and the Hazardous Materials Specialist of the Motor Carrier Division established the notification system and procedures for the implementation of Chapter 424, Public Acts of 1979, which deals with the transportation of spent nuclear fuel. The notification authorized in this statute is received and the information maintained by the Transportation Rate Division.

In 1979, the Director of the Transportation Rate Division was elected First Vice President of the National Conference of State Transportation Specialists. In addition to his responsibility as First Vice President, he also served as Chairman of the Hazardous Materials Transportation Committee.

Utility Rate Division

The Utility Rate Division has the responsibility of recommending and investigating rates for all telephone, mobilphone, gas, electric, and water and sewer companies under the jurisdiction of the Commission. In addition, the Utility Rate Division has the responsibility of reviewing, interpreting, and overseeing the implementation of the rules and regulations utilized by the utilities in administering approved rates.

Generally, the rates charged by a utility are based on the utility's overall cost of service. Proposed rates are submitted by the utilities in either the form of a rate petition or a tariff filing under the Commission's rules. Rate petitions are filed by utilities to affect general rate changes and tariff filings are made to establish rates and charges for new services or to affect other changes in the utility's existing tariff.

The Utility Rate Division's investigation of petitions for general rate changes includes the accumulation of data pertaining to the cost of specific services and the analysis of rate relationships in order to make recommendations on rate design. In making recommendations to the Commission on rate design, the Utility Rate Division must be aware of the wants and needs of the ratepayers so that rates designed to cover the utility's cost are balanced with the public's interest.

The Utility Rate Division investigates proposed rates submitted as tariff filings under Rule 401.6. Rule 401.6 allows utilities to submit proposed changes or amendments to its tariff provided that the Commission is given 30 days notice. Most of the tariffs filed under this rule deal with new service offerings or the modifications of existing tariff offerings. These filings are reviewed to determine their reasonableness which entails an investigation of the cost studies submitted with the filings and the demand for new services. After the investigation is completed, the tariff filing may either be allowed to become effective or suspended until formal action is taken by the Commission. During 1978, the Utility Rate Division processed 284 tariff filings from the following types of utilities:

Telephone	225
Gas	80
Water & Sewer	3
Mobilphone	2
Electric	1
Total	311

The Utility Rate Division maintains a complete and current file of all utility tariffs together with the rules and regulations used to administer approved tariffs. The division is called on daily to interpret and oversee the administration of the rates approved for the utilities.

During 1979, 525 inquiries or complaints were received in the form of letters, telephone calls, or personal visits concerning utility rates or the rules and regulations to administer them. As a result of these inquiries, a continual review is made of rate structures and rules to insure that they are administered fairly by the utilities. A breakdown of these complaints or inquiries by type of utility is as follows:

Telephone	393
Gas	62
Electric	23
Water & Sewer	19
Mobilphone	2
Non-Regulated Utilities	26
Total	525

The Utility Rate Division participates in depreciation rate studies for the utilities under the jurisdiction of the Commission. Depreciation rates are particularly significant since they determine the cost of service of the utility. The staff of the Utility Rate Division joins with the Engineering Division in making these depreciation studies.

During 1979, General Telephone Company of the Southeast requested approval of increased depreciation rates which would produce an increase in annual accruals in Tennessee of $257,000. During a three-way meeting involving the staff, General Telephone Company, and the Federal Communications Commission, depreciation rates were agreed upon which resulted in a reduction of $5,000 in annual accruals. We also performed a depreciation rate study on Millington Telephone Company during 1979 in connection with a rate case.

The Utility Rate Division also participated in the investigation of eighteen applications for approval of additional capital. Approval was granted for $530,027,150 of additional capital for future expansion and replacement of existing facilities. A review was made and recommendations were submitted to the Commission for consideration of each of these applications.

Utility Service Division

The Utility Service Division performs the staff work in the regulation of public utilities concerning service. This includes the investigation of all complaints received from customers concerning telephone, telegraph, electric, gas, water, and sewerage companies which are regulated by the Public Service Commission. The Utility Service Division also conducts service hearings and community meetings throughout utility company's franchised areas.

The Public Service Commission regulates nineteen (19) telephone companies, one (1) telegraph company, one (1) electric company, seven (7) gas companies, eighteen (18) water companies and two (2) sewerage companies.

Pursuant to 6-2637 T.C.A., the Public Service Commission has only limited jurisdiction over utility districts. Moreover, the Public Service Commission cannot initiate an investigation of a utility district relative to rate and/or service until a petition is filed with the Commission by at least ten (10) percent of the residents within the authorized area of the public utility district.

The Utility Service Division is comprised of a Director, one secretary, four stenographers, and thirteen field investigators. The Division has district offices in Knoxville and Memphis. The Utility Service Division also has field investigators stationed in Clarksville, Camden, Chattanooga, Jackson, Memphis, McMinnville, Nashville, Columbia, Church Hill, Greeneville & Knoxville.

Every complaint received in the Utility Service Division is assigned to an investigator for a comprehensive investigation. Moreover, the utility company against whom the complaint was filed is also required to conduct an investigation, and report its findings to the Utility Service Division. The findings of both investigations are reviewed by the Director for a final disposition.

Another function of the Utility Service Division is a consumer survey program. The purpose of this program is to determine the quality of service utility customers are receiving throughout the state. The investigator selects utility customers at random and makes a personal visit and discusses their problems, if any, and conducts tests. The findings of each investigator are submitted to the Director's office for evaluation and appropriate action.

The Division also conducts tests of telephone equipment. This program involves the field investigator making test calls from various business and residential main stations to other business and residential main stations within the same exchange. Also test calls are made between exchanges to determine the adequacy of trunk lines. The public coin telephone investigation program is another function of the Utility Service Division.

ABSTRACT OF MINUTES

The abstract of minutes of the Tennessee Public Service Commission submitted hereafter covers the period from January 1, 1979, to December 31, 1979.

The minutes of the Tennessee Public Service Commission are kept on permanent file in the office of the Executive Director. These are available to the public for inspection at all times. The Official Minutes show every action taken by the Commission. The abstract of the minutes are recorded in permanent bound volumes and are prepared in a manner permitting immediate reference to the actions of the Commission. The following data are submitted in connection with each item of business.

1. Docket Number.
2. Name of Applicant or Petitioner.
3. Subject matter of application or petition.
4. Date of final order.
5. A summary of the Commission's action relative to the matter.

An abstract or condensation of the minutes of the Tennessee Public Service Commission covering the period of January 1, 1979, through December 31, 1978, show a total of 7,265 actions related to motor carriers, 198 actions related to railroads; and 145 actions related to utilities.

During the year ended, 7,214 final orders have been written and entered on the Commission's Minute Books; and a total of 7,211 filings have been received by the Commission.
